0.) - must bring back

18.) old than

20.) used to

17.) - I have lived

19.) <sup>as was</sup> why we don't going

## IV. Writing.

d) The impact of Gender Stereotypes on Teenagers' Career Choices, Some people claim that Career Choices do not have gender, while others argue that women must work like women. In this essay I would like to express my point of view on this issue. As far as I am concerned career choice it is really vital thing in teenagers' life. To begin with your profession with your future. But nowadays we have a lot of gender stereotypes. Why? The particular reason for our circumstance it is a lot of people, many people think that women can not work in the men's job. I am afraid that I can not agree with this idea. First of all what is «men's job»? Considering that we live in country, we have (b) independence, liberty. Gender stereotypes affect teenagers' perceptions of career options. Moreover if you want choose men's or women's job it is not men's or women's job. Career do not have gender. It is all about people. So one should, nevertheless consider the problem from another angle. However I truly believe that gender in career choice it is not matter. Along the lines of, if one teenage or boy wants work like mail master he can work. Because gender stereotypes can affect teenagers' perceptions. Career option it is all about your dream; so I think for the exact of purpose teenagers should achieve their goals and improve their skills even though gender stereotypes. In light of this evidence I think it's crystal clear that gender stereotypes - it's mistake.
